

„Cathedral City Cologne“

Cologne, over 2000 years old, is addictive. Anyone who has ever lived in the attractive cathedral city never wants to leave again. It is this unique feeling, the result of a cheerful way of life, an atmospheric city experience and Mediterranean flair that captivates everyone who experiences it and brings on homesickness in forced absentees.

The Cologne Cathedral is one of the architectural masterpieces of mankind. Declared a World Cultural Heritage Site as a perfect example of Gothic construction, the Cologne Cathedral is the symbol of the Rhenish city. And with about six million visitors a year, Germany's largest Cathedral is also the country's most popular architectural monument.
